CRITERIA	CHATGPT	Gemini
STRUCTURE	Simple structure, most likely just copied the format from the prompt.	More organized structure, still based on the prompt but has more work done on it.
CLARITY	Was satisfactory but only have simple answers	The answers given were more comprehensive
FORMATTING	The formatting was most likely copied from the prompt and thus a little lacking	The formatting was more neat and tidy, while also changing the other of information to appear more clear
OVERALL QUALITY	The resume given by Chatgpt was good but not great	The resume given by Gemini is comprehensive and very well arranged

Reflection

Both of the LLMs presented general competence in generating a resume but I found Gemini to be better because it changed the formatting to fit in a more modern style while Chatgpt followed the format of the prompt and gave more simplified answers. A noted difference between the two is that Chatgpt provided an additional information section to the resume, stating willingness to work and being a team player focusing on an appeal to work relationships, while Gemini added a Reference section which states that references are available if needed which speaks to a focus on individual credibility and ability.

In the Final resume I firstly used the formatting of Gemini because I felt that the one given by Chatgpt was too simple and not eye catching enough, I used the descriptions Chatgpt have because a short and understandable phrases are more effective when describing work experiences so that if the interviewer wanted more information interview you yourself can give an more detailed explanation about your experiences that I feel cannot fully translate on paper

When it comes to promoting I feel if you want an exact thing you have to be very precise because anything that's not leaves room for the AI to interpret into something you may not want, but if you want some interpretation like when brainstorming for ideas that's where minimal detail and straightforward questions work best.
